

Engage Patients with Virtual Care

Telehealth Solutions to Fit Your Workflow Specialties

Launch your virtual patient care strategy while leveraging your current EHR and provider network with a turnkey telehealth solution from Enovate® Medical and VisuWell®

VisuWell's telehealth software platform, professional consultation and implementation service paired with Enovate Medical's mobile workstation technologies and service allow you to integrate virtual patient visits into your current EHR workflows for enhanced patient access to your network of providers.

From initial consultation to implementation, we'll navigate your custom telehealth workflows for primary care as well as remote access for highly specialized physicians and more.

Discover the advantages for your telehealth solutions

Rhythm cloud-based software remotely monitors the performance of Envoy and Encore EcoFlex workstations. **EcoFlex Power Management** optimizes battery power to support multiple devices while extending overall battery life. Working in tandem, these technologies deliver a more dependable platform so you are always charged and ready for virtual patient visits.

Keep your clinical staff and patients virtually connected
with Enovate Medical telehealth solutions.
